

Curriculum Vitae

David Rondinone, Ph.D., P.E.
Mechanical Engineer, Principal

Bio/Summary

Dr. Rondinone has over 20 years of experience in mechanical engineering, including design and failure analysis, fire suppression, explosions, flammability, flame arrestors, ignition, finite element analysis, accident reconstruction and crashworthiness, mechanical testing, failure of mechanical connections, dynamic stability of equipment and structures, pressure vessels and pipelines, medical implants and equipment, and automotive component analysis and design. Mechanical engineering projects have included failure analysis of the Deepwater Horizon oil rig, engineering logic analysis and review for the California Public Utilities Commission, design reviews and testing for flame arrestors and fire suppression, and complex thermal and stress analyses of piping, pressure vessels, and other mechanical components.

Select Industry Experience

- Oil & Gas Industry
- Earthquake Engineering
- Automobile / Truck / Motorcycle
- Medical Devices
- Manufacturing
- Heavy Equipment
- Offshore Oil Platforms
- Maritime
- Plastics / Metals /Ceramics
- Combustible Fluid Containers; Transport, Fire Propagation and Suppression
- Aviation
- Roofs
- Elevators
- Construction
- Heat Exchangers
- Piping, Pipelines & Pressure Vessels
- Bridge Dampening
- Transportation
- Large Structures
- Ships / Sailboats

Education

Ph.D. in Mechanical Engineering from U.C. Berkeley
M.S. in Mechanical Engineering from U.C. Berkeley
B.S. in Engineering Physics and B.A. in Astrophysics from U.C. Berkeley

Professional Affiliations

Registered Mechanical Engineer, State of California

Work Experience

Berkeley Engineering and Research, Inc., Mechanical Engineer

August 93 - Present

Design and Failure Analysis, Engineering Research, Fracture Analysis, Fitness-For-Service Analysis, Finite Element Analysis, Accident Reconstruction and Crashworthiness, and Mechanical Testing.

Failure analysis work has included fire suppression and flammability tests, flame arrestors and tests for explosions; failure of mechanical connections, including bolts and bolted connections, welds, etc.; dynamic stability of scissor lifts and excavators; mechanical failure of hydraulic system components; failure of medical implants and medical equipment; and failure of industrial and safety equipment.

Research work has included detailed studies of flame arrestors in portable gas cans and other combustible liquid/gel containers, explosions, fire suppression systems and materials; the flange stress response; creep behavior of longitudinally welded pipes at high temperature; design of structural supports for a cryogenic superconducting MRI machine; design review of medical implants; dynamic analysis of multistory manufacturing facilities; frequency analysis of silicon wafer fabrication components; design and analysis of pressure vessels and piping systems; leak method detection in tanks; burner/mixer mechanical design; and automotive component design.

Finite element analysis experience has included hundreds of models, ranging from simple two dimensional linear elastic analysis of pressure vessels to complex three dimensional nonlinear analyses of a bolted engine connecting rods, medical implants (spinal implants, arterial implants), automotive components, and full contact dynamic analyses of crane clutch components.

Testing has included hundreds of tests of gasoline and other combustible liquids and gels, mechanical testing of pressurized systems (piping, connections, tanks, etc.) and mechanical and electrical testing of automotive, industrial, and safety equipment.

4D Imaging, Inc., Vice President of Engineering

January 04 - Present

Management and development of three-dimensional scanning devices and services. The devices developed include scanners for coke drums and refinery piping systems, corrosion inspection, microscopic inspection and evaluation, small to large mechanical component inspection and evaluation, and scene documentation. Services provided include mechanical

Curriculum Vitae

and thermal stress analysis, component failure and life assessment, finite element analysis, and mechanical and scene documentation and evaluation.

Lecturer, Mechanical Engineering Department, U.C. Berkeley
August 96-December 96

Fundamentals of Mechanical Behavior of Materials, Course ME-102A

Graduate Teaching Assistant, Mechanical Engineering Department, U.C. Berkeley
August 95 - May 96, August 97 - December 97, January 99 - May 2000

Mechanical Engineering, Fracture, Material Behavior, and Polymers ME-223, ME-224, and ME-225/MSE 212.

Graduate Research Assistant, Mechanical Engineering Department, U.C. Berkeley
July 94 - May 2002

Fatigue testing of engineering polymers, primarily polycarbonate and ultra-high-molecular-weight-polyethylene.
